

METEOWARE NT

System and evaluation software for SYNMET

Option wind statistics:
different informative views of frequency
distribution of wind direction and wind speed

Genial insights...

offers the software MeteoWare NT into the reading series of the data logger SYNMET. The windows operating surface is well organized, standardized and easy to understand. Parameters and sensors which are to be adjusted are pre-defined and quickly to adjust by a select menu.

- safe data transport, filing and evaluation of long series of meteorological data
- specific SYNMET configuration recallable, adaptable and reloadable
- clearly arranged digital and analogous display of momentary values
- curve and column diagrams
- up to 60 instruments and 20 virtual channels usable per measuring station
- special wind charts with selectable scaling

Professional Line

(9333) MeteoWare NT Software

Settings:

system configuration • **correction value** per sensor • password protection for user authority • user status with special function release • **individual screen views** by simple choice of default parameters/ sensors

Instantaneous display:

digital up to **51 instruments** • analog up to 15 instruments in one screen view • visual **monitoring of limit values** (red upward/ blue downward)

Raw data display:

are values without taking the sensor correction value into account (diagnostic mode/ server status) for simple system checking • **preventions of manipulations**

Data bases:

fraud-proof • durable marking of interferences • **transferable** to other user terminals • **comparison** of the values from different stations in one data base • data export in the ASCII-, Excel- or dbase-format

Special functions:

deposited formulary for calculation of indirect parameters, e. g. dew point or precipitation total • **formula editor** for calculation of individual parameters by up to 5 directly measured input values

Varieties:

- 36.09333.000 000
- 36.09333.100 000
- 36.09333.200 000
- 36.09333.300 000
- 36.09335.000 000

(9333-0) MeteoWare NT Basic module · 1 station · 1 user

(9333-1) MeteoWare NT Add-on module · 5 additional users · in the network

(9333-2) MeteoWare NT Add-on module · 5 additional stations

(9333-3) MeteoWare NT Add-on module · wind statistics

(9335-0) MeteoWare NT MeteoWare Tools · optional · CD with the configuration- and diagnostic program COMMANDER · incl. 2 m-cable · SYNMET/ PC · adapter
