

To a tee...

is relative humidity measured - even behind walls or in inaccessible rooms.

The classical fitted hair hygrometer entices with its clear and precise scale (Ø 103 mm) which can even be read from greater distances.

- high accuracy through treated natural hair measuring element
 - large temperature range
 - easy mounting on flange ring Ø 120 mm
- ventilation shafts ● chimneys
● humidors ● storage rooms

Standard Line

(235 E250) Mounting Hygrometer

Id-No. 00.02350.125 000

Measuring element:

natural hair string

Measuring range:

5...100% r. h.

Accuracy:

± 2.5% r. h. with regular regeneration

Resolution/ Scale:

≤ 2% r. h./ 2% r. h.

Range of application:

humidity 0...100% r. h. ● temperatures -60...+70°C

Housing/ Dimensions:

installation depth 250 mm · total depth D 280 mm · flange Ø 120 mm
RAL 5009 (azure) · mat chromium-plated cover ring for front glass ·
scale Ø 103 mm · dial silver anodized · with black inscription

Weight:

0.4 kg
